## Summary

---

Dynamic and innovative Web Developer with expertise experience in frontend development life cycle and systems integration. I specialize in front-end development with React JS, HTML5, and CSS3/SASS. Experienced in providing technical leadership, configuring applications, and leveraging technologies to advance client-first strategies.

## Education

---

### Post Graduation in Web Development

Sept 2022 – Dec 2023

*Conestoga College, Kitchener, ON*

GPA: 3.48/4

### Bachelor of Technology in Computer Science

Aug. 2018 – June 2022

*Silver Oak College of Engineering and Technology*

CPI: 8.51/10

## Skills

---

**Frontend:** React JS, Redux, Babel, React Hooks, HTML5, CSS3/SASS

**Backend:** Node JS, Express, GraphQL

**Database:** MongoDB, SQL

## Experience

---

### Software Engineer

May 2022 - Aug 2023

*PROMOUNT Technologies LLP*

*Ahmedabad, Gujarat*

- Developed and maintained a hospital admin dashboard allowing administrators to create, assign, and manage patient tasks, appointments, and documents using React.js.
- Built a patient portal for viewing, checking in, and canceling appointments, downloading medical documents.
- Created frontend of managing appointments, queues, clinics, settings, billing and transactions features.
- Ensured the application was responsive and optimized for different devices.
- Enhanced the user experience by integrating notifications and reminders for upcoming appointments.

### Software Engineer Intern

Jan 2022 - April 2022

*PROMOUNT Technologies LLP*

*Ahmedabad, Gujarat*

- Implemented a user-friendly interface allowing users to explore detailed product pages, add items to the cart, and proceed to the payment page effortlessly.
- Integrated user authentication using toastify for registered members to access personalized dashboards, enabling them to track their order history conveniently.
- Curated and customized web pages using CSS frameworks such as TailwindCSS and SCSS, to streamline development processes and enhance styling flexibility.

## Projects

---

### Cinechum | React JS, MongoDB

Jun 2023 - Aug 2023

- Designed and implemented multiple sections with current API data such as Home, Popular movies, top rated movies, upcoming movies to categorize and display movies effectively.
- Created a detailed movie information page showcasing movie name, duration, budget, review, earnings, genre, IMDb review, and number of reviews.
- Integrated theme toggle functionality, allowing users to switch between dark and light modes for a personalized viewing experience.
- Implemented a search option for users to retrieve detailed information about any movie quickly and efficiently.

### Github Finder | React JS

Jan 2023 - April 2023

- Retrieved user data through an API and displayed profile pictures and usernames of all relevant users.
- Allowed users to click on individual profiles to see detailed information including repositories, followers, following, Twitter handle, and location.
- Enabled navigation to github link of user.

## Leadership / Extracurricular

---

### Volunteer

Jan 2019 - Dec 2019

*Participated in organizing IEEE event*

*Silver Oak University*
